YEAR 3/4 Experiments and story telling

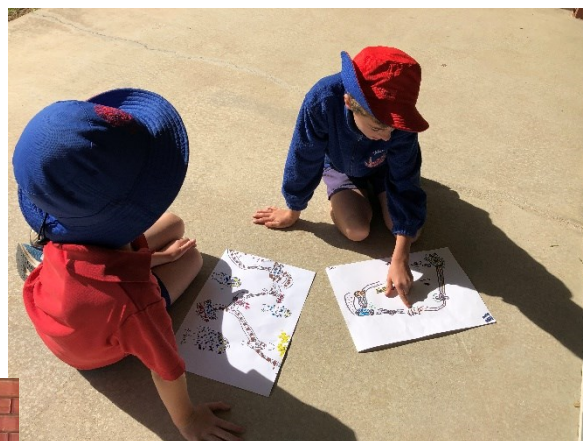

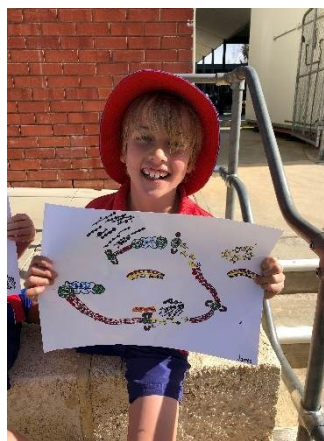

In Science we have been looking at different types of soils, rocks and landscapes around us. We have conducted several experiments looking at the different features of soil and rocks and how they can change over time. Our latest experiment was to explore the effects of water erosion and see if different variables can slow down the erosion. They are at the back of the classroom if you would like to have a look at them.

In Geography we have been exploring the relationship between language, country, place and spirituality for the indigenous cultures of Australia. We were introduced to aboriginal culture through dreamtime stories like the Rainbow Serpent. We have looked at significant people in Aboriginal history and why they are important and looked at how Aboriginal people passed on information through paintings. We painted our own stories and enjoyed sharing them with our peers.

Library News

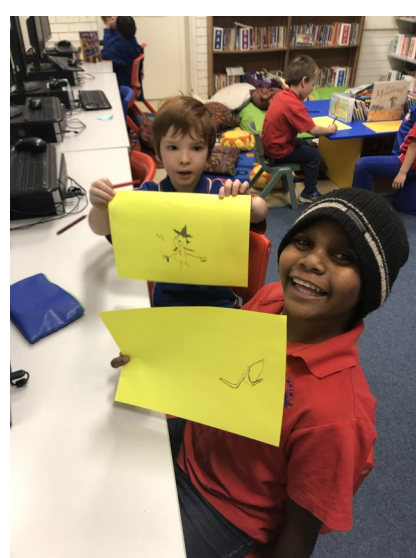

In Term 2 the students worked very hard at increasing their reading and ten students were rewarded with a bookmark for being Term 2's highest book borrowers. They were Lincoln, Kaylee, Nick, Daniel, Luke, Megan, Ree-anna, Milly, Angelique and Maylee. Well done.

At the end of term all students from Pre-Primary to grade 6 are going to design a book review of a book they have enjoyed reading. You're very welcome to look at your child's masterpiece hanging in the library.

Well done all students on their returns through this term.

Happy reading
